Brainstorm & Idea Prioritization :

This section records the team's brainstorming, grouping of ideas and prioritization for PocketSmart AI. The goal is to generate multiple possible approaches before selecting the most relevant and feasible concept.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected Problem Statement

People often struggle to find suitable products and services within a fixed budget because they need to search and compare many options manually. They need a smart assistant that understands their budget and requirements and provides personalized recommendations.

Selected Idea

Step-2: Brainstorm, Idea Listing and Grouping

Idea Group	Brainstormed Ideas
Budget Management	• Budget calculator • Budget allocation • Expense planning • Saving suggestions
Home Interior Planning	• Furniture recommendations • Room decoration suggestions • Budget-based interior planning • Home product recommendations
Party / Event Planning	• Food recommendations • Venue suggestions • Party budget allocation • Event planning
Jewelry Recommendations	• Budget-based jewelry selection • Jewelry recommendations • Outfit image input • Jewelry matching suggestions
AI & Personalization	• Gemini AI recommendations • Personalized suggestions • Image-based recommendation • Recommendation history
Shopping & Product Discovery	• Product comparison • Amazon suggestions • Flipkart suggestions • IKEA suggestions

Step-3: Idea Prioritization

Ideas are prioritized using the same Importance–Feasibility concept shown in the template. High-importance and high-feasibility ideas are treated as core project features.

Idea	Importance	Feasibility	Priority Area
Budget-based AI recommendations	High	High	Core
Home interior planner	High	High	Core
Party budget planner	High	High	Core
Jewelry recommendation planner	High	Medium	Core
Image-based jewelry recommendation	High	Medium	Important
User login and recommendation history	Medium	High	Supporting
Live price tracking	Medium	Low	Future/Optional
