Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Set Budget & Needs	Stage 2: Explore Recommendations	Stage 3: Decide & Save Plan
Actions <i>What does the customer do?</i>	• Decides to plan a purchase, home makeover, party or jewelry choice • Selects the planning type (Home Interior, Party or Jewelry) • Enters the budget and personal requirements	• Reviews the personalized recommendations • Compares suitable options and their estimated cost • Adjusts the budget or preferences if needed	• Selects the options that fit best • Checks the total against the budget • Saves the plan for later reference
Touchpoint <i>What part of the service do they interact with?</i>	• PocketSmartAI home screen • Planning-type selection (Home Interior / Party / Jewelry) • Budget and requirements input form	• Recommendation results screen • Estimated spending / budget view • Preference and filter options	• Final plan summary • Saved plans and history • Online shopping and event platforms used to buy or book

Customer Thought <i>What is the customer thinking?</i>	• Can I do this within my budget? • Which option is suitable for my occasion? • I do not want to waste money	• Do these suggestions match my requirements and style? • How much of my budget will this use? • Is there a better alternative?	• I am within my budget • I can come back to this plan later • This saved me time and effort
Customer Feeling <i>What is the customer feeling?</i>	• Worried about overspending • Overwhelmed by too many choices • Hopeful for a simple process	• Curious and engaged • Relieved as choices narrow down • More in control of spending	• Confident and satisfied • Reassured about the budget • Happy to save time

Process Ownership <i>Who is in the lead on this?</i>	User enters the budget and requirements; PocketSmartAI guides the input	PocketSmartAI generates the personalized recommendations; user reviews them	User makes the final decision; PocketSmartAI stores the saved plan
Opportunities <i>How can we improve this stage?</i>	• Simple guided form with easy budget entry • Clear category cards for Home Interior, Party and Jewelry • Ask only for essential preferences	• Show estimated spending for each option against the budget • Make side-by-side comparison easy • Personalize by occasion and style	• One-tap saving of the plan • Display remaining budget in the summary • Reuse earlier plans for similar needs
